**PLUG & MOVE**  
FROM AURORA STORAGE:  
MAKING IT SIMPLE

CASANATENSE LIBRARY, ROME, ITALY

## BRINGS ARCHIVES INTO THE FUTURE

No matter how forward-thinking your organization considers itself, it's likely that your high-density record storage system is trapped in the past.

Today we take instant access to information for granted— but in fact, 90% of high-density mobile storage worldwide relies on manually operated shelving, often coupled with manually maintained organizational methods. Electrically powered mobile shelving systems are available, but their cost can be prohibitive. Despite their best intentions, organizations wishing to future-proof their record storage may find themselves forced to continue using existing systems.

If you find yourself in this position, you're not alone.

Now there's a way to modernize your archives with a solution that brings your existing equipment into the future: **PLUG&MOVE** from Aurora Storage— making it simple!

## EASY CONVERSION

While high-density mobile record storage systems do an excellent job of maintaining a large archive in a limited footprint, issues with access remain.

The shelving components themselves, and the tracks upon which they move, are rarely of concern: rather, the difficulty often rests with mechanically assisted hand cranks. While these are a great improvement over fully manual sliding track systems, they still require physical effort and provide no automated archiving features.

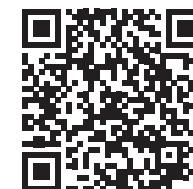

Till now, transitioning from a hand crank to an electronic system has meant the need to completely refit archive stacks— a daunting task.

**PLUG&MOVE** from Aurora Storage makes it simple! With minimal effort, the patented **PLUG&MOVE** box retro-fits to your existing hand-cranked shelving and converts it to a system that lets you access any record with the touch of a button. And even in the face of time and budget pressures, you are in control— the system is expandable, letting you convert some shelves now, and others later.

# SMART FEATURES

- 100% compatible with all existing brands
  - Easy installation in 40 min or less
  - Runs on standard 120V power, with battery backup and manual override
  - Simple control panel
  - Fully automated
  - Low cost
  - Infrared sensor for safety
  - Safety and security features including key card access
  - Remote controllable via device with customizable **PLUG&MOVE** software that provides exact file location and check-out/check-in. Search, use barcodes, analyze statistical data... these and more features coming soon.
- PLUG&MOVE** is constantly evolving, but always MAKING IT SIMPLE.

## INNOVATIVE APP

With **PLUG&MOVE** from Aurora Storage, any brand or model of manually operated shelving becomes an intelligent electronic archive, including a **SMART AUTOMATION SYSTEM** that can memorize every document in your archive and track it with perfect accuracy.

No more misplaced records or frustrating searches! And the Smart Automation System includes an innovative app which guarantees full control from a remote device such as a tablet, computer or smartphone. Users can customize every aspect of their archive management operations, including support for barcodes, key card access and more. Ask what exciting new features are currently available and in development!

## MAKING IT SIMPLE... AND **SAFE**

**PLUG&MOVE** will revolutionize the way that you store and organize your items— but it's more than just smart. It's safe and secure, too, thanks to Aurora's range of options and accessories. Choose from features such as:

**INFRARED FLOOR SAFETY SWEEP** Designed to stop carriage movement when activated by a person or object, ensuring safe and reliable operation.

**INFRARED AISLE ENTRY SAFETY:** Safely stops carriage movement upon aisle entry.

**PASSIVE AISLE BLOCK** ensures the safety of multiple users by requiring the user to return to the open aisle keypad before opening a new aisle.

**PROGRAMMABLE AISLE LOCKS** Securely lock aisle through programing to prevent unauthorized access to certain aisles.

**LOCKABLE DOORS** that provide an extra layer of security for your stored items, keeping them safe from unauthorized access.

**WAIST-HIGH FLOOR LOCK** which prevents any unwanted movement of your storage system.

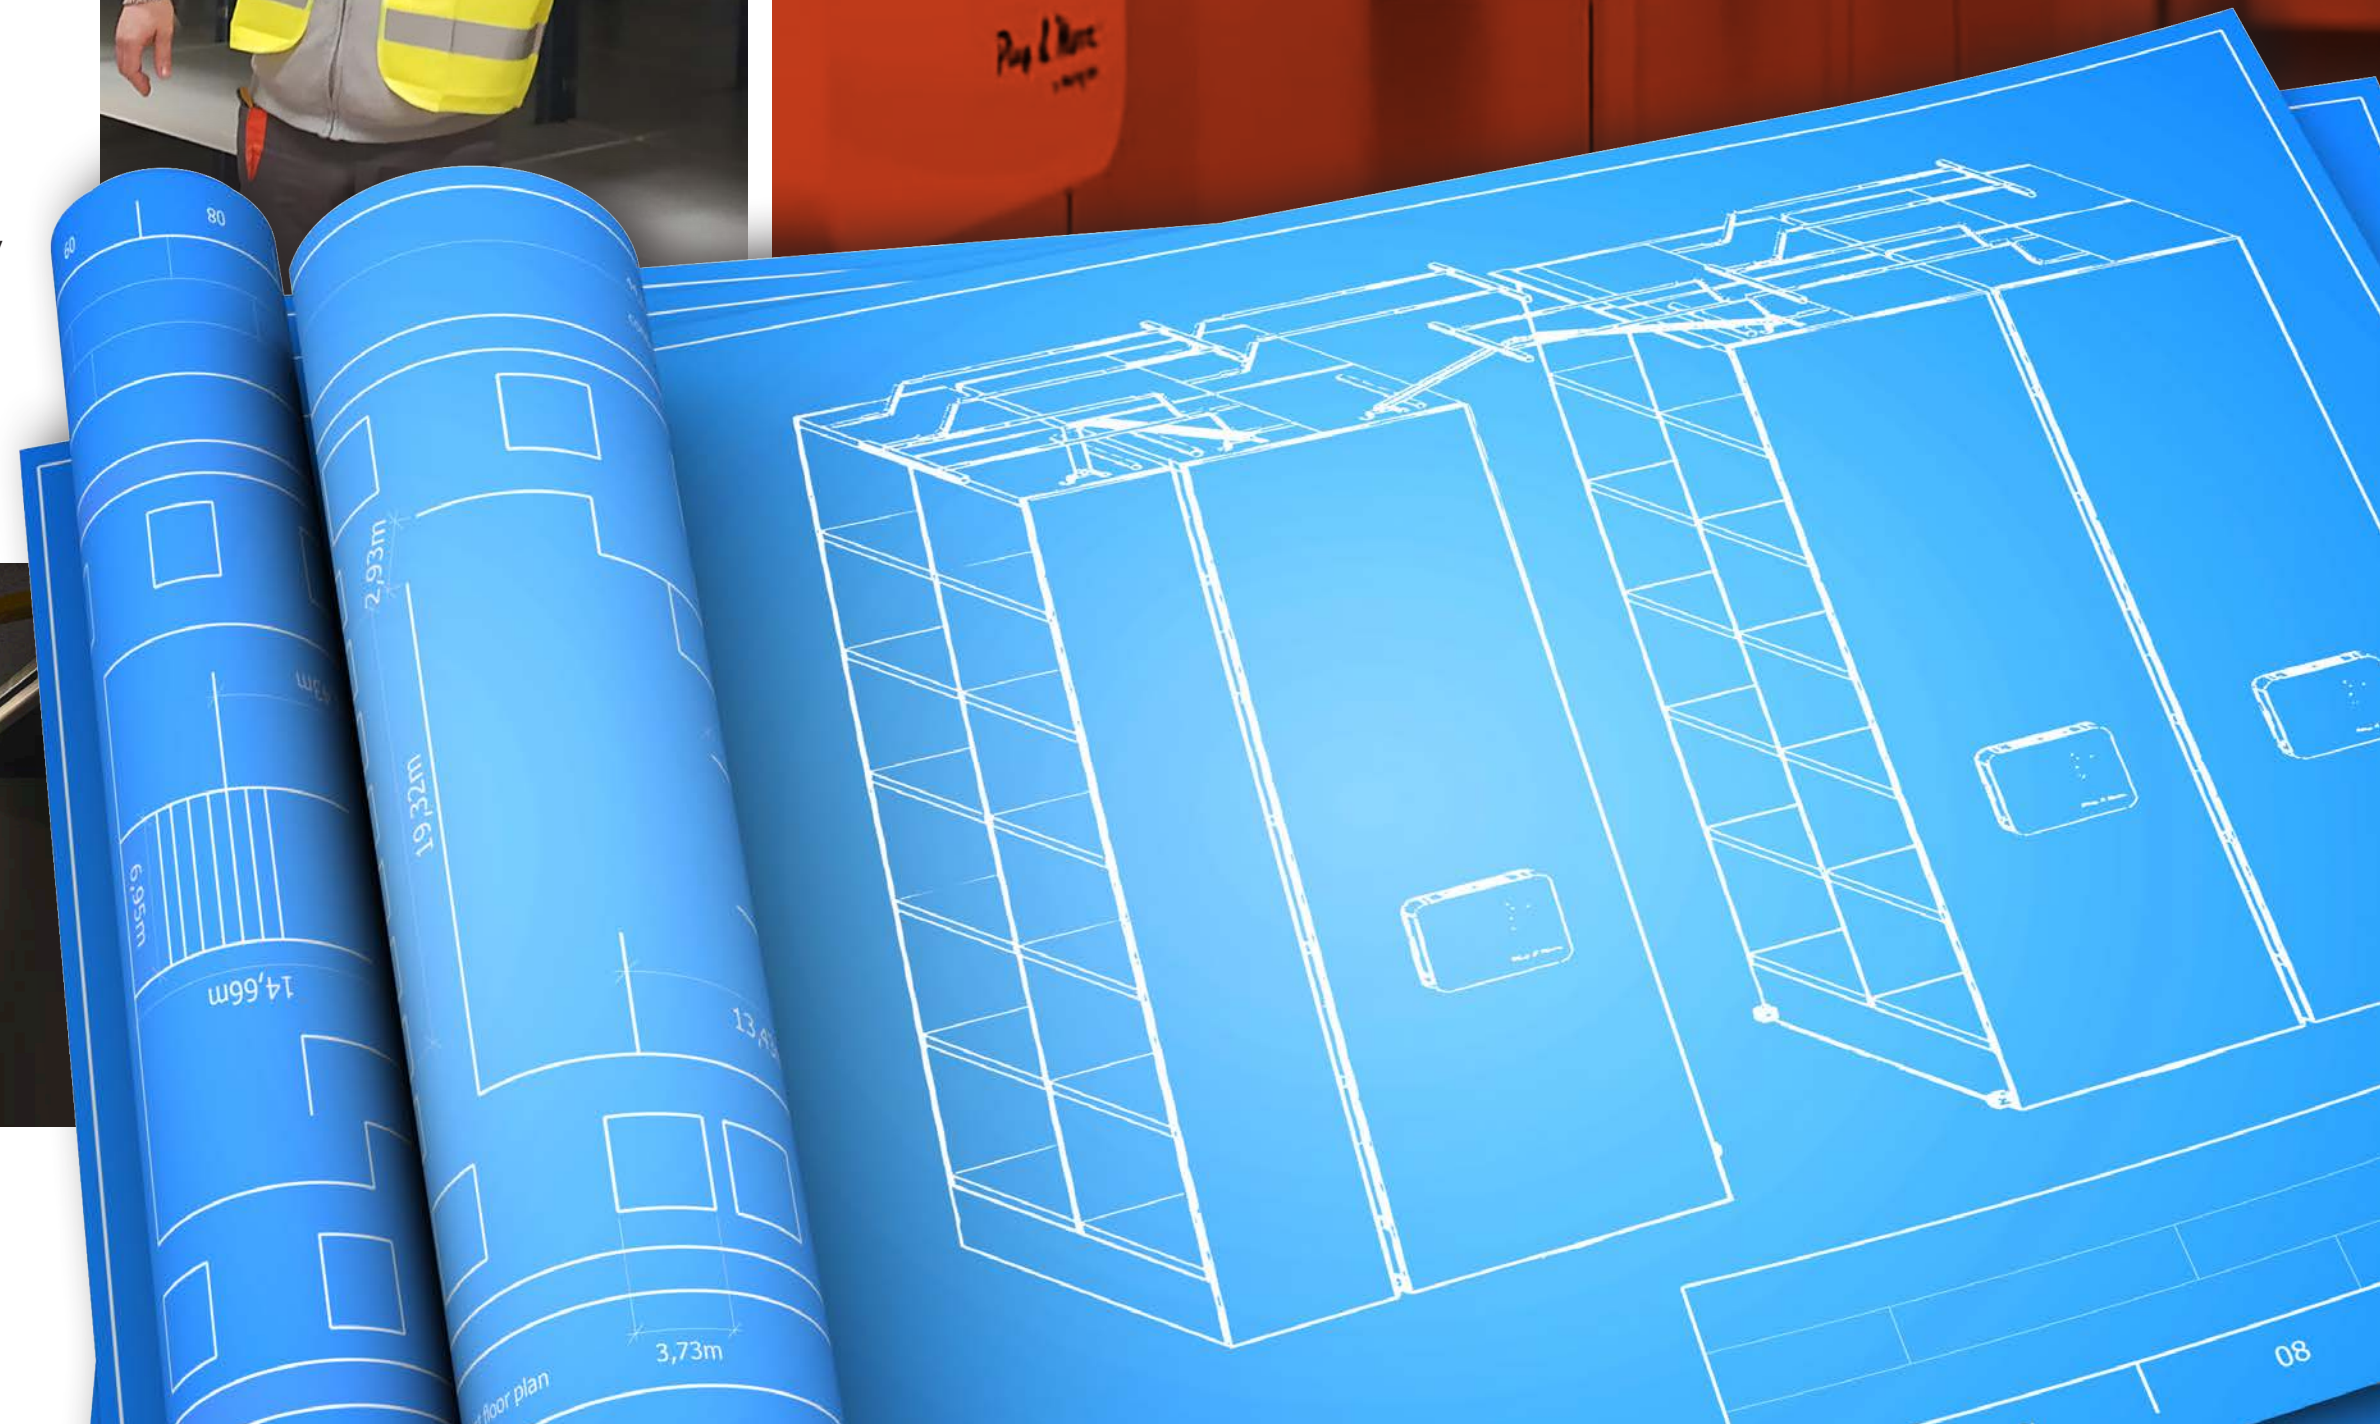

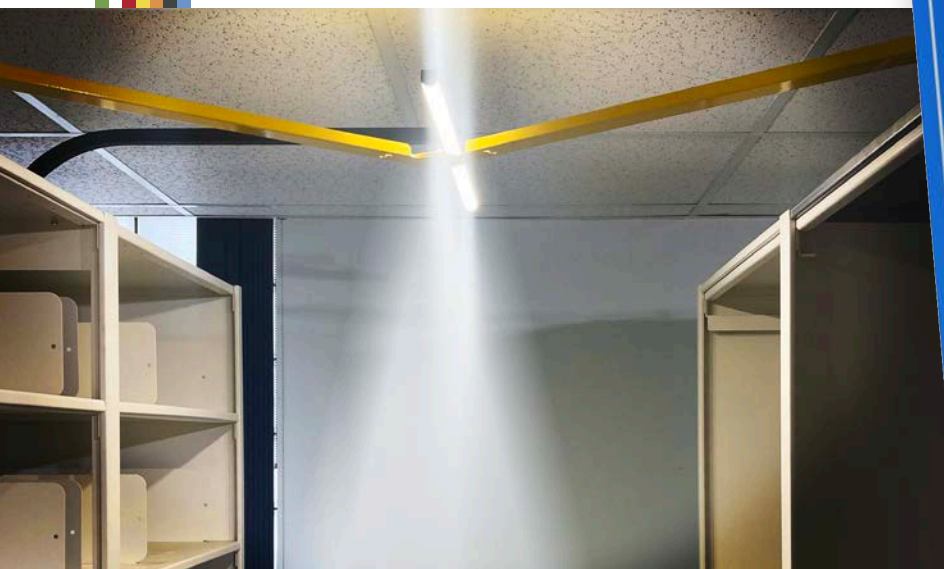

**BATTERY BACK-UP** Standard on all Plug & Move controls in case of power outage.

Ask your Aurora Storage rep for more information on which of these options best fit your needs.

## BRIGHT SOLUTIONS

Powering your high-density record storage system with **PLUG&MOVE** from Aurora Storage is a perfect opportunity to add or upgrade lighting for safer, more accessible archive management.

Our flexible LED lighting system moves along with your shelving— once again taking what can be a difficult installation and making it simple. Its solid-state bulbs are environmentally friendly and, given their low energy usage, automatic on/off function and exceptionally long lifespan, remarkably cost-effective.

## SEEING IS BELIEVING

**PLUG&MOVE** from Aurora Storage was developed in partnership with UCLA's Anderson School of Management and as such is truly an international phenomenon.

With an installation that makes it simple—offering minimum disturbance to existing infrastructure— and clean-lined control boxes which can either remain unobtrusive or be decorated as part of an interior architecture program, it's the natural choice for retrofit into some of the world's most iconic archives.

Look at just a few of its applications and imagine what **PLUG&MOVE** from Aurora Storage can do for you!
