

AUTOMATED DAY USE LOCKER

The Vidir Automated Day Use Locker is an automated storage and retrieval system that provides the perfect solution to temporary, secure, personal storage requirements for Offices, Universities, Colleges, Hospitals, Libraries, Athletic Facilities, Fitness Centers, Malls and more.

VERTICAL STORAGE

The Locker makes use of wasted vertical space to allow a larger number of storage lockers in a narrower footprint. There is no need for expansive widths to provide the number of lockers needed.

ERGONOMICS

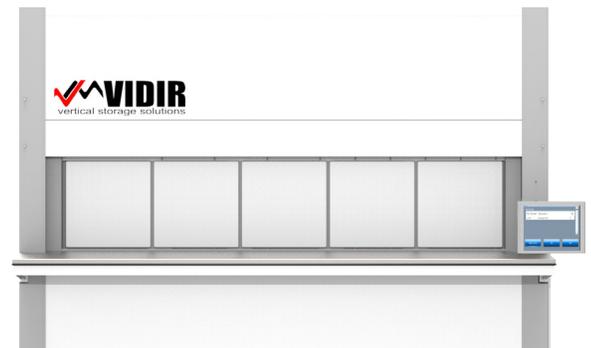

The ergonomic height of delivery for every locker ensures maximum availability and accessibility for all users. Uncomfortable and unnecessary bending or straining to access lockers is thereby eliminated, making for an enjoyable experience for all.

ALL-METAL DESIGN

The All-Metal Locker design provides high security protection, and peace of mind for stored items.

INTUITIVE SOFTWARE

Intuitive software allows for assigning locker spaces, automatic reset of lockers after use, remote monitoring of the lockers, and even monetizing the usage of lockers should you desire to charge a fee for the service.

- User friendly pick up & drop off interface
- Utilizes overhead space to increase storage availability over horizontal locker storage
- Security locks and password protection to keep belongings safe while stored
- Ergonomic access points for all lockers
- Available options for height and width, and multiple locker arrangements to fit your needs
- Remote monitoring of lockers for programming and assistance
- Report generation for access logs and usage statistics
- Available RAL Color change to compliment your decor

Safe Handling • Easy Access • Maximum Storage • Fast Retrieval • Small Footprint
